THE EAST .- A German paper brings news from Beyrout of the 8th of July. The negociations with the princes of Lebanon were taking an unfavorable turn for the Sultana. The Bedonins were laying waste the environs of El Arish. The repairs of the fortifications of Acre had been completed, and many important additions have been made by English cagineers to their strength. A convent on Mount Carmel and been fixed upon as a garrison for Eaglish troops, but basing been represented as neutral ground, under the protecion of the French, will not be so occupied. The moustakeers appear every where opposed to the restoration of the Turkish domination. The prevailing wish of the Christian population is to form an independent kingdom, having Jerusalem for its cadital. This is a notion which nothing at force of arms will incline them to relinquish; and to r co them to obedience would, it is affirmed, require a Turkish army of not fewer than 50,000 men.

the Black Sea. There is every promise of a profitable working of the mineral, under the patronage of the Porte. This may prove a most important discovery is aid of free commu nication with the East.

The British forces still in possession of Alexandria are trengthening the fortifications of that place.

Mehemet Ali has given orders in France and Belgium for

a number of Paixhans guns for the fortifications there.

Accounts from Alexandria mention that Mehemet Ali was not abating his armament and military precaution. He had set on foot an active impressment for forcing the fellahs to labor in his shiffiks. The capitation tax was still levied with

the utmost rigor.

The Porte has charged Mehemet Ali to reconquer the holy cities which have fallen into the hands of the Arabs since their evacuation by the Egyptian troops, and has farmished the Pasha with the means of defraying the expenses of the expedition, besides consenting to remit considerably the amount of the tribute originally required of him. It is fur-ther rumored that he intends confiding to him a similar mis-
